SUMMARY

Computer Science graduate specializing in full stack web development, with hands-on experience building responsive web applications using React.js, Next.js, Node.js, Express.js, MongoDB and SQL Server. Completed internships involving RESTful API development and React/Redux front-end components, and built projects featuring JWT/OAuth authentication, Razorpay payment integration and an AI-powered health assistant. Consistent DSA practice in Python, with a strong interest in building scalable software as part of a professional development team.

SKILLS

Languages: Python, Java, JavaScript, SQL

Frontend: React.js, Redux, Next.js, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, OAuth

Database: MongoDB, MySQL

Core CS: DSA, OOP, Operating Systems, RESTful APIs, Database Integration

Tools: Postman, Git, GitHub, VS Code, Vite

EXPERIENCE

AI Product & Full Stack Developer Intern

Rooman Technologies Pvt. Ltd. | BPUT Rourkela (On-site) | Jan 2026 – Apr 2026

- Completed a 4-month Full Stack Development & AI internship as part of a placement-linked training program under Rooman Technologies Pvt. Ltd.
- Gained hands-on, project-based exposure to both frontend and backend development, working across the complete web development lifecycle.
- Practiced core programming and problem-solving using HTML, CSS, JavaScript, Java, Python, and SQL through structured training modules and real-world coding assignments.
- Worked on database technologies and database integration concepts, strengthening understanding of how frontend applications connect with backend data systems.
- Collaborated with peers and mentors in a structured training environment, building discipline in following industry-standard development workflows and best practices.
- Received the "Application Developer (Web and Mobile)" certification upon successful completion of the internship, validating full stack development competency.

Frontend Developer Intern

QSkill | Remote (Virtual) | Jul 2026 – Aug 2026

- Completed a 1-month virtual Front-End Development internship through QSkill, focused on building modern, responsive user interfaces.
- Strengthened core front-end fundamentals including HTML5, CSS3, and JavaScript through hands-on tasks and mini-projects. Gained practical experience with React.js for building component-based, reusable UI structures.
- Learned state management concepts using Redux to handle complex application data flow.
- Strengthened analytical thinking and teamwork skills by working independently in a remote, deadline-driven internship setting.

PROJECTS

Health Management System | *Full Stack Healthcare Platform*

React.js, Vite, Tailwind CSS, Node.js, Express.js, SQL Server, JWT, Ollama

- Developed a full stack healthcare management platform with three role-based portals (Patient, Doctor, Admin), each with a dedicated dashboard, protected routes and REST API modules, using React, React Router, Axios and Tailwind CSS for a responsive UI.
- Implemented secure authentication with JWT and bcrypt password hashing, and custom Express middleware to restrict admin-only endpoints; patient registration includes input validation, duplicate-email checks, auto-generated patient IDs and a welcome email via Nodemailer.

- Built an end-to-end appointment workflow in which patients request appointments and doctors approve (with date, time and notes) or reject them, along with an appointment-linked chat module for patient–doctor communication.
- Designed a relational SQL Server schema (users, doctors, appointments, chats) using primary keys, unique and CHECK constraints and foreign keys, with parameterized queries through the MS SQL library to prevent SQL injection.
- Integrated an AI health assistant (Health Bot) using a locally hosted LLM via Ollama, with a classifier and keyword fallback that limit responses to health-related queries, and a guarded prompt that avoids diagnosis or prescriptions.

Get Me a Chai | Full Stack Crowdfunding Platform

Next.js, React.js, Tailwind CSS, MongoDB, Mongoose, NextAuth, Razorpay

- Developed a full stack crowdfunding platform where creators receive support from fans, with a dynamic public profile page for every creator showing profile details and a leaderboard of the top 10 supporters.
- Implemented authentication using NextAuth with GitHub OAuth, including automatic user creation in MongoDB on first login and custom session callbacks to attach the stored username to the session.
- Integrated Razorpay using Next.js server actions and API routes: orders are created server-side with each creator's own credentials, and payments are marked successful only after server-side signature verification.
- Designed Mongoose schemas for users and payments, and built server actions to fetch users and payments with sorting and limiting for the supporter leaderboard.
- Built a creator dashboard to update profile details, images and payment credentials with username uniqueness validation, and a responsive Tailwind CSS interface with reusable components and React-Toastify feedback.

Lingua Bridge | Language Translator

React.js, Tailwind CSS, Vite, Google Translate API

- Developed a responsive language translation web app using React.js, Vite and Tailwind CSS, integrated with the Google Translate API.
- Implemented error handling for invalid API keys and network failures, and manually tested each failure scenario to verify correct behavior.
- Designed a dark-gradient UI with a responsive grid layout that adapts across mobile, tablet and desktop screens.
- Built user-interaction features including copy, text swap and loading states, and verified them across multiple use cases.
- Deployed the application live on Vercel.

EDUCATION

Radhakrishna Institute of Technology & Engineering

2022 – 2026

B.Tech in Computer Science and Engineering, CGPA: 7.39

Jawaharlal Nehru H S School, Kuanpal

2020 – 2022

Higher Secondary (12th) | Percentage: 58%

Bagmi Biswanath Bidyaniketan, Mulabasanta

2020

Matriculation (10th)

CERTIFICATIONS

- Web Development Fundamentals — IBM SkillsBuild
- Python Full Stack Developer Virtual Internship — EduSkills / AICTE
- JavaScript Certification — OneRoadmap
- Advanced Python Programming (21-Day Masterclass) — IETE

LANGUAGES

English, Hindi, Odia
